

# LESSON 3

## A DAY WITH NANDU

### CLASS 4 SUBJECT EVS

Summary of the lesson

- Elephants move in a group. A group of elephants is called herd.

- A herd of elephants has a baby elephants and female elephants.

- Male elephants live in the herd till they are 14-15 years old. Then they leave the herd and move alone.
- An adult elephant can eat more than 100 kilograms of leaves and twigs in one day.
- Elephants have big ears that work like fans and help to keep them cool.
- A herd may have 10 to 12 female elephants and young ones.
- Young ones of elephants love to play in water.

- 
- Like elephants other animals also live together in the group.
  - They move in search of food.
